PROFILE

University of Bristol MSc Management student (Digitalisation and Big Data) and Central University of Finance and Economics graduate (GPA 87.36/100; Outstanding Graduate). Uses SQL, Python, Excel and Power BI reporting methods to turn large datasets into revenue, product and KPI insight. Portfolio work includes a 1.6M+ row UK retail ETL analysis and a 1.23M-record App Store market-structure study. Targeting graduate and entry-level Data Analyst and BI Analyst roles in the UK.

Portfolio highlights: UK retail - 1.6M+ raw rows cleaned to 524,878 analysable transactions; £10.6M+ sales analysed | App Store - 1.23M records analysed

CORE SKILLS

- **Data tools:** SQL (MySQL, SQLite); Python (pandas, NumPy, matplotlib, seaborn); Excel (PivotTables, Power Query); DataGrip and PyCharm.
- **BI and reporting:** Power BI reporting methods, KPI design, revenue and trend reporting, and stakeholder-ready insight communication.
- **Business analysis:** Problem definition, market-structure analysis, financial and risk-management foundations, accounts receivable and reconciliation.
- **Development support:** Git/GitHub, React, TypeScript, Next.js, Supabase/Postgres, Vercel, Swift and SwiftUI.

EDUCATION

University of Bristol

Sep 2025 - Sep 2026 (expected)

MSc Management - Digitalisation and Big Data

Bristol, UK | English-taught and assessed

- Completed 120 credits; highest-scoring module: Strategy, Finance and Accounting for Management (75, Distinction level). Focus areas: big data analytics, digitalisation and value creation, research methods, operations and marketing.

Central University of Finance and Economics & Victoria University

Sep 2021 - Jul 2025

BSc International Trade and Economics - Financial Risk Management

GPA 87.36/100 (3.7/4.0) | Outstanding Graduate (2025) | University Second-Class Academic Scholarship (2022, 2023)

- Selected quantitative and business modules: International Trade (97), Macroeconomics (96), Econometrics (94), Business Statistics (93), International Economics (92), Decision Accounting (90), Portfolio Management (88).

PROFESSIONAL EXPERIENCE

Data Analyst Intern - Licheng Holdings Group, Data Asset Division

Jan 2025 - Mar 2025

Jinan, China

- Benchmarked six core workflows in the internal data management system, mapping reporting and data-access processes to establish baselines for workflow and reporting improvements.
- Supported integration and rule tuning for a DeepSeek-assisted reporting module, contributing to an estimated 40% improvement across report-generation efficiency and field-matching accuracy.
- Produced 8+ test cases and SOPs for data-governance and access workflows; worked with Product, Operations and Sales to roll out updated reporting processes across three departments, reducing repetitive manual rework by approximately 20%.

Sales Intern - Aerospace Information (Shandong) Technology Co., Ltd.

Jul 2021 - Aug 2021

Jinan, China

- Built an Excel receivables tracker covering 4,000+ customer records, recording customer responses, payment status and follow-up progress.
- Used response data to refine call scripts, improving call-to-payment conversion by 4-5 percentage points and helping recover more than RMB 100,000 in receivables within one month.
- Prepared daily reconciliation logs and weekly receivables summaries for Finance to track collection progress.

SELECTED DATA PROJECTS

UK Retail Transactions - SQL ETL, Data Cleaning and Revenue Analysis

2025

SQL | MySQL | Python | pandas | matplotlib | GitHub

- Built a reproducible SQL cleaning pipeline that transformed 1.6M+ raw rows into 524,878 analysable transactions by addressing duplicates, invalid product codes, missing descriptions and non-positive quantities or prices, and converting Excel serial dates.
- Automated MySQL-to-Python extraction and analysed £10.6M+ in sales; identified Nov 2011 as the peak month at more than £1.4M and ranked the highest-revenue products for business review.

Apple App Store - SQL and Python Data Quality and Market Analysis

2026

SQLite | Python | Data-quality flags | Market structure | GitHub

- Cleaned and analysed 1.23M records in SQLite and Python, creating quality flags for missing values, invalid dates, pricing logic and size anomalies, with derived fields including Size_MB and Quality_Issue_Count.
- Quantified market structure: 1.13M free versus 102,502 paid apps; free apps averaged about 893 reviews versus 89 for paid apps, while Games was the largest category at 193,328 apps - evidence for pricing and category analysis.

APPLIED RESEARCH PROJECT

Workplace Wellbeing During the Education-to-Employment Transition

May 2026 - Sep 2026 (ongoing)

Applied Extended Project | Partner: The Talent Lighthouse | University of Bristol Business School | Five-person team

- Working with The Talent Lighthouse to study workplace wellbeing among professionals 0-3 years after graduation, supporting the design of employer support recommendations.
- Helped narrow a broad early-career mental-health need into a practical, non-clinical workplace-wellbeing question; synthesised academic and industry evidence on transition stress, belonging, AI-related uncertainty and access to support.
- Co-designed a mixed-method survey with branching for students and employed early-career participants, maintaining six documented iterations; planned analysis includes descriptive statistics and thematic coding.
- Prepared participant information, consent and recruitment materials; the final deliverable will translate evidence into actionable recommendations for employer support design.

ADDITIONAL TECHNICAL PROJECTS

- **Personal fitness web application (ongoing):** Next.js/TypeScript, Supabase Auth and Postgres, row-level security, SQL migrations and Vercel deployment.
- **Native macOS and productivity tools:** Swift/SwiftUI menu-bar hydration reminder with local JSON persistence and LaunchAgent; Python time tracker with CSV/Markdown export and Notion sync.
- **Bilingual portfolio website:** React/TypeScript/Vite site on GitHub Pages with project case studies, SQL/Python samples and report visualisations.

AWARDS

- Outstanding Graduate, Central University of Finance and Economics (2025); University Second-Class Academic Scholarship (2022, 2023).
- University First Prize, National College Student Innovation, Creativity and Entrepreneurship Challenge (2023); University Second Prize, CMAU Market Research and Business Planning Competition (2023).

ADDITIONAL INFORMATION

- **Languages:** Mandarin Chinese (native); English (professional working proficiency; currently studying and assessed fully in English in the UK).
- **UK right to work:** Student visa (up to 20 hours per week during term; verifiable via GOV.UK share code). Available for full-time work from Sep 2026 and intends to apply for the Graduate visa after course completion.
